JOURNAL OF COMPUTATIONAL AND APPLIED MATHEMATICS

Volume 140, Numbers 1–2, 1 March 2002

Contents

Preface xi

M.B. Abd-el-Malek, M.M. Kassem and M.L.M. Meky
Group theoretic approach for solving the problem of diffusion of a drug through a thin membrane 1

M. Ahues, F. D'Almeida, A. Largillier, O. Titaud and P. Vasconcelos
An L^1 refined projection approximate solution of the radiation transfer equation in stellar atmospheres 13

L.J. Alvarez-Vázquez, A. Martínez, C. Rodríguez and M.E. Vázquez-Méndez
A wastewater treatment problem: study of the numerical convergence 27

J. Anttila
A spline collocation method for parabolic pseudodifferential equations 41

C.T.H. Baker, C.A.H. Paul and H. Tian
Differential algebraic equations with after-effect 63

C. Brezinski, M. Redivo Zaglia and H. Sadok
A review of formal orthogonality in Lanczos-based methods 81

B. Bujanda and J.C. Jorge
Additive Runge–Kutta methods for the resolution of linear parabolic problems 99

K. Chen, A. Hussein and H.-B. Wan
On a class of new and practical performance indexes for approximation of fold bifurcations of nonlinear power flow equations 119

W.M. Cheung and M.K. Ng
Block-circulant preconditioners for systems arising from discretization of the three-dimensional convection–diffusion equation 143

L. Daruis, P. González-Vera and F. Marcellán
Gaussian quadrature formulae on the unit circle 159

C. Davini
Γ-Convergence of external approximations in boundary value problems involving the bi-Laplacian 185

M.C. De Bonis, B. Della Vecchia and G. Mastroianni
Approximation of the Hilbert Transform on the real semiaxis using Laguerre zeros 209

N. Del Buono and C. Mastroserio
Explicit methods based on a class of four stage fourth order Runge–Kutta methods for preserving quadratic laws 231

Z. Dostál, J. Haslinger and R. Kučera
Implementation of the fixed point method in contact problems with Coulomb friction based on a dual splitting type technique 245

A.B. Dragut
Heuristic allocation based on a dynamic programming state-space representation 257

J.T. Edwards and N.J. Ford
Boundedness and stability of solutions to difference equations 275

S. Ehrich
On stratified extensions of Gauss–Laguerre and Gauss–Hermite quadrature formulas 291

M. Farhloul and M. Fortin
Review and complements on mixed-hybrid finite element methods for fluid flows 301

D. Fasino
Approximation of nonnegative functions by means of exponentiated trigonometric polynomials 315

R. Fazio
A survey on free boundary identification of the truncated boundary in numerical BVPs on infinite intervals 331

I. Gómez, I. Higueras and T. Roldán
Starting algorithms for low stage order RKN methods 345

J. Hendrickx and M. Van Barel
A Kronecker product variant of the FACR method for solving the generalized Poisson equation 369

V. Horvat and M. Rogina
Tension spline collocation methods for singularly perturbed Volterra integro-differential and Volterra integral equations 381

T. Iwai
Geometric mechanics of many-body systems 403

L.Gr. Ixaru, G. Vanden Berghe and H. De Meyer
Frequency evaluation in exponential fitting multistep algorithms for ODEs 423

A.H. Khater, D.K. Callebaut, W. Malfliet and E.S. Kamel
Bäcklund transformations and exact solutions for some nonlinear evolution equations in solar magnetostatic models 435

A.H. Khater, W. Malfliet, D.K. Callebaut and E.S. Kamel
Travelling wave solutions of some classes of nonlinear evolution equations in $(1 + 1)$ and $(2 + 1)$ dimensions 469

K.J. Kim, R. Cools and L.Gr. Ixaru
Quadrature rules using first derivatives for oscillatory integrands 479

A.W. Lang and D.M. Sloan
Hermite collocation solution of near-singular problems using numerical coordinate transformations based on adaptivity 499

D. Lazzaro and L.B. Montefusco
Radial basis functions for the multivariate interpolation of large scattered data sets 521

P. Lima and T. Diogo
Numerical solution of a nonuniquely solvable Volterra integral equation using extrapolation methods 537

M.C. López de Silanes, M.C. Parra and J.J. Torrens
Vertical and oblique fault detection in explicit surfaces 559

G. Mastroianni and D. Occorsio
Numerical approximation of weakly singular integrals on the half line 587

D.S. Meek
Coaxing a planar curve to comply 599

G.V. Milovanović and M.M. Spalević
Quadrature formulae connected to σ-orthogonal polynomials 619

M. Morháč, V. Matoušek and J. Kliman
Optimized multidimensional nonoscillating deconvolution 639

O.M. Ogreid and P. Osland
Some infinite series related to Feynman diagrams 659

A. Plaza and M.-C. Rivara
On the adjacencies of triangular meshes based on skeleton-regular partitions 673

R. Riaza and P.J. Zufiria
Discretization of implicit ODEs for singular root-finding problems 695

T. Sakurai and H. Sugiura
Improvement of convergence of an iterative method for finding polynomial factors of analytic functions 713

H. Swann
On approximating the solution of the non-stationary Stokes equations using the cell discretization algorithm 727

G. Tiesinga, F.W. Wubs and A.E.P. Veldman
Bifurcation analysis of incompressible flow in a driven cavity by the Newton–Picard method 751

K.W. Tomantschger
Series solutions of coupled differential equations with one regular singular point 773

L.T. Watson
Probability-one homotopies in computational science 785

P. Wilders and G. Fotia
A positive spatial advection scheme on unstructured meshes for tracer transport 809

C.A. Woodham and H. Su
A computational investigation of pole-zero cancellation for a double inverted pendulum 823

R.K. Wright
A robust method for accurately representing nonperiodic functions given Fourier coefficient information 837

T. Yamamoto
Convergence of consistent and inconsistent finite difference schemes and an acceleration technique 849

S.-N. Yang and Y.-J. Yang
Step length problem for trimming curve approximation in tessellating trimmed surfaces 867

Author Index Volume 140 (2002) 877
